DEPARTMENT OF HUMAN RESOURCES (DHR)  
DEPARTMENT OF HEALTH AND MENTAL HYGIENE (DHMH)**

**Affordable Care Act (ACA) Healthcare Reform Project**

**Exchange Board Meeting – IT Update**

*August 10, 2012*

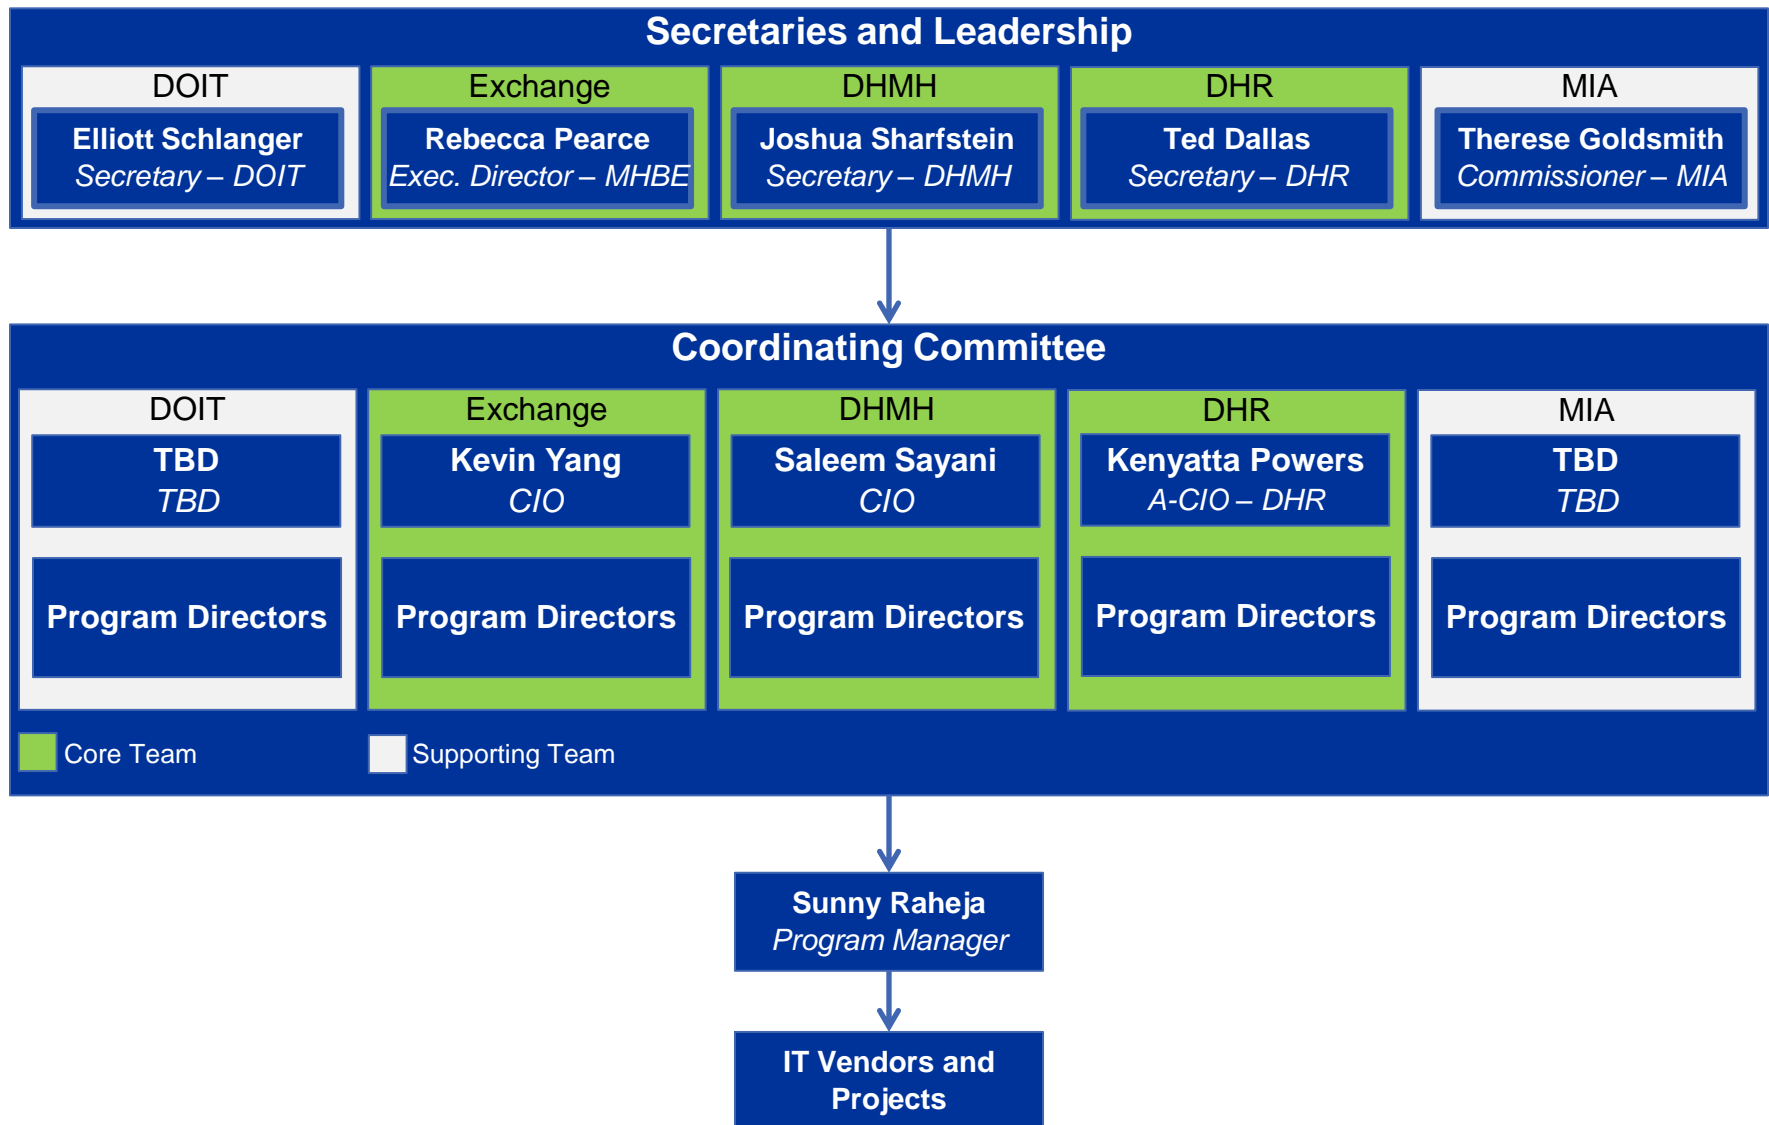

*PMO*

# Agenda

---

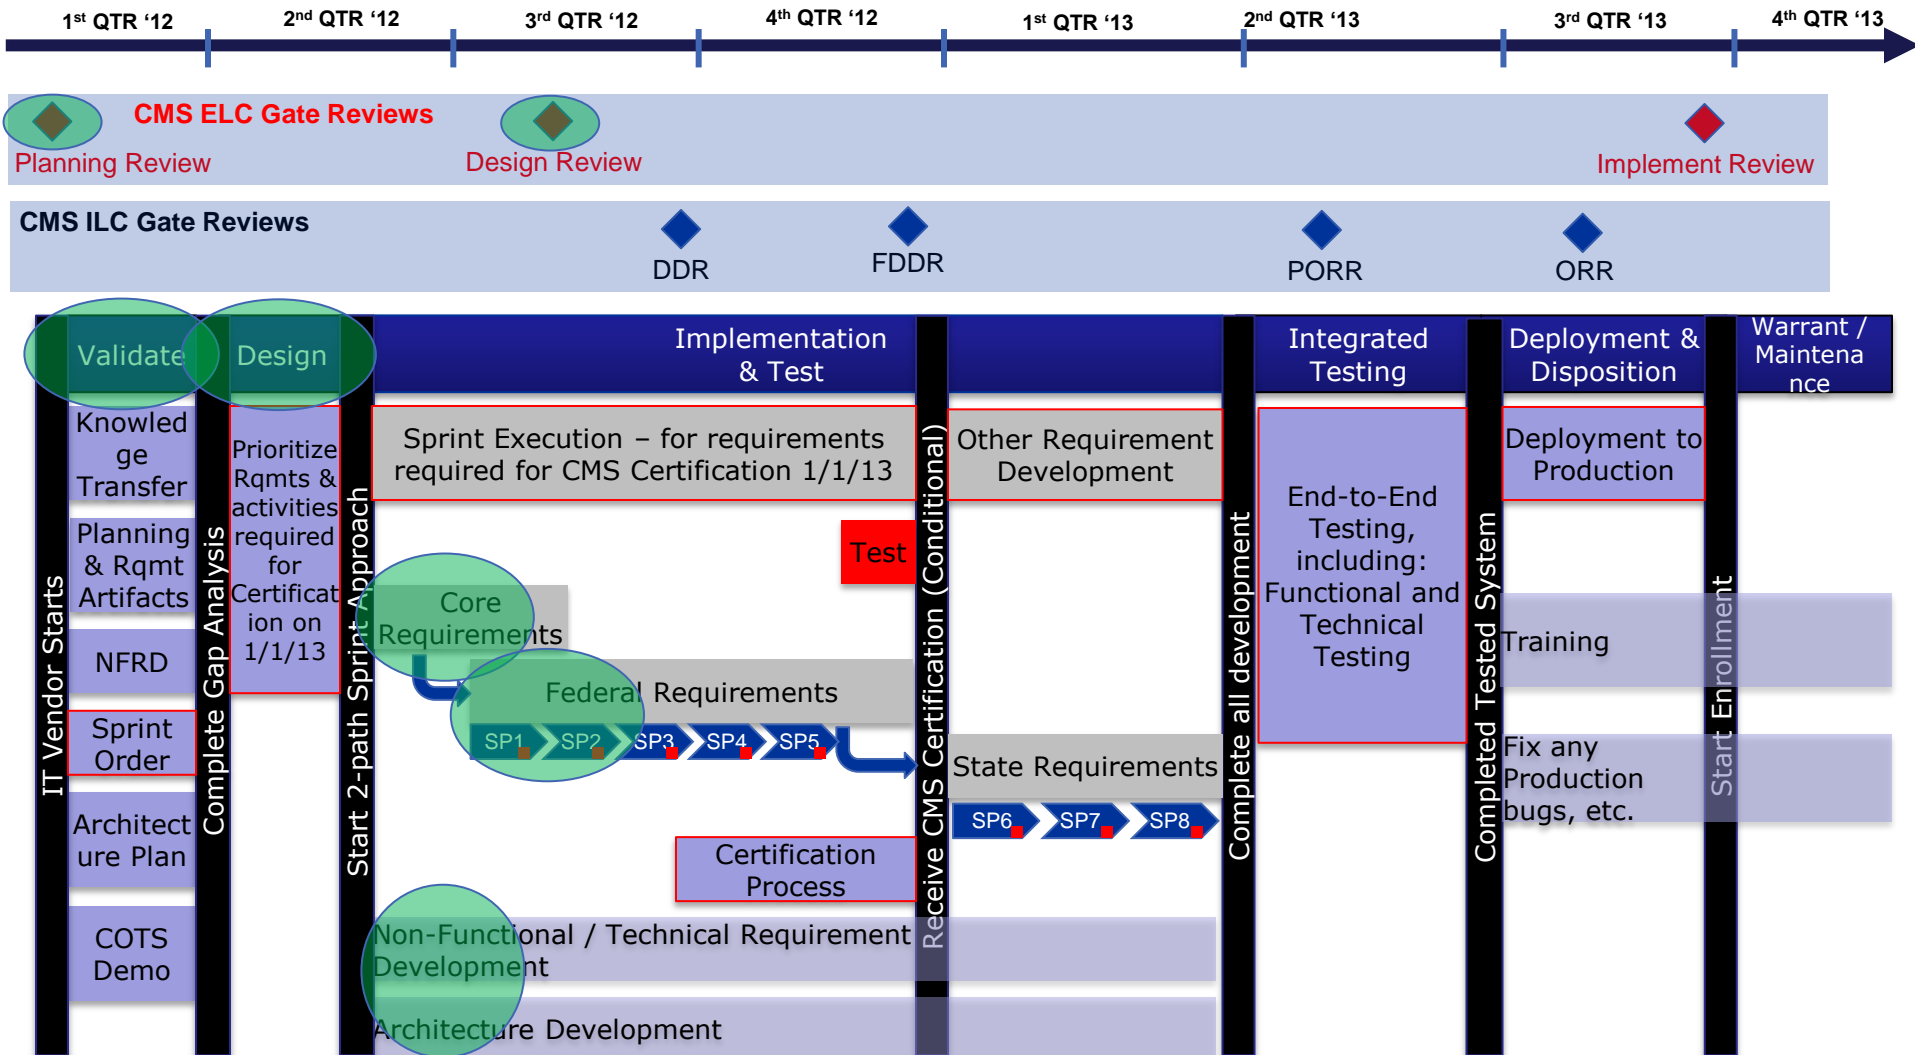

- Established IT Governance Structure
- Sprint Stakeholder Involvement and Feedback process
- Sprint Strategy and Approach
- Testing Strategy and Approach
- HIX as the single entry portal
- Solutions Overview
- Q and A

# Overall IT Governance Structure

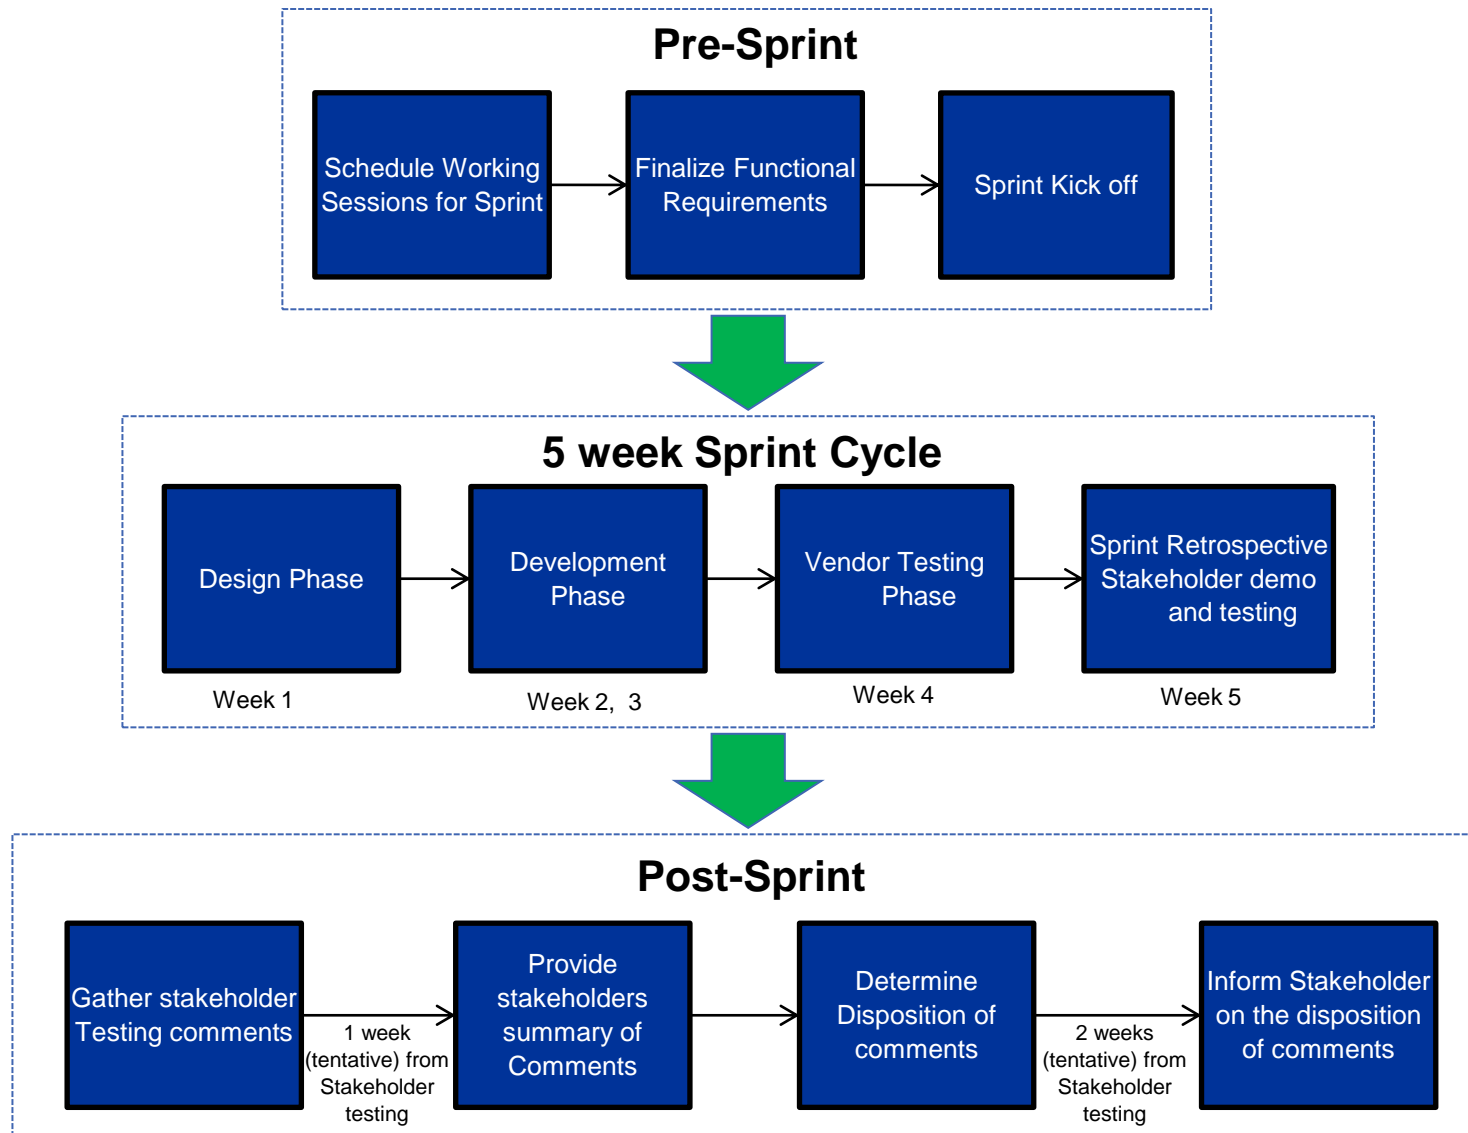

# Project Timeline and Milestone Update

Following is illustration of the MD HIX Milestones and Timeline superimposed with bubbles on tasks / phases that have been completed until now.

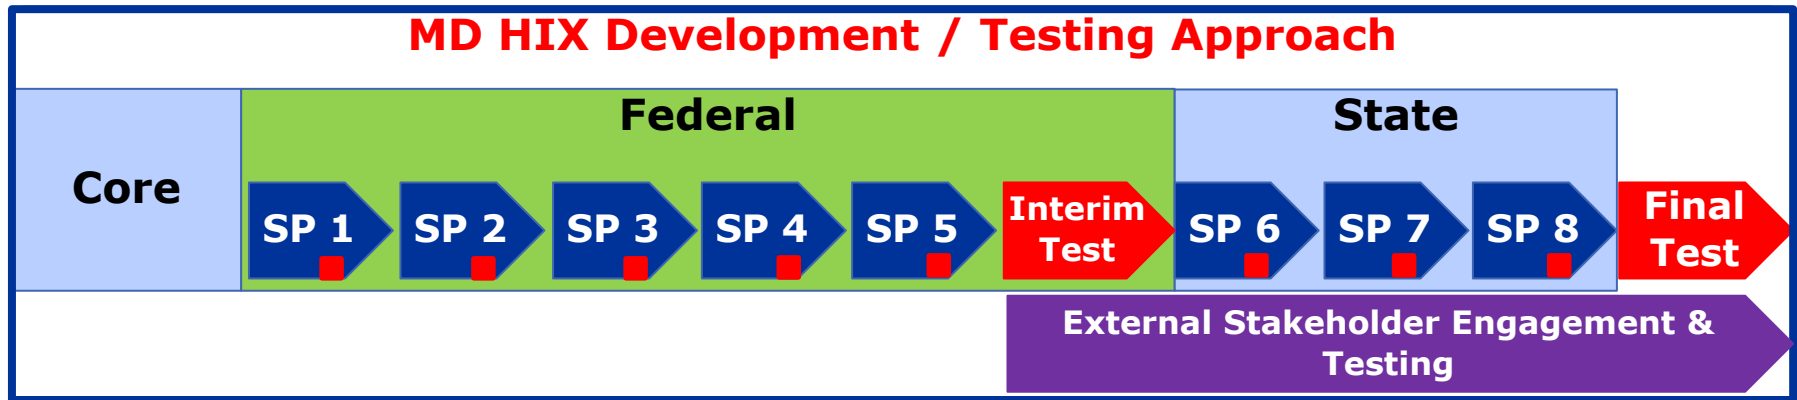

Key: DDR – Detail Design Review; FDDR – Final Detail Design Review; PORR – Preliminary Operational Readiness Review; ORR – Operation Readiness Review Complete

# Sprint Stakeholder Involvement and Feedback process

# Testing Strategy / Approach

- Development has been decomposed into three major phases:
  - Core – During this phase a proof-of-concept of the technology solution is developed and communication amongst COTS products and the Federal Data HUB is established
  - Federal – During this development phase, Federally mandated requirements and requirements associated with the CMS Certification Blueprint are addressed
  - State – During this development phase, MD specific requirements will be addressed
- Interim Test - External Stakeholder Engagement Kick-Off
  - At the end of “Federal” sprint development, integrated testing of the entire functionality that has been developed will be performed.
  - External Stakeholders will be introduced to the solution and will have the opportunity to participate in user acceptance testing and provide general feedback / comments.
- External stakeholders will be provided access to the “under development” solution intermittently throughout sprints 6 – 8 to conduct testing / provide feedback.
- Final Test - At end of sprint development (~2<sup>nd</sup> QTR 2013), external stakeholders will once again have access to the HIX solution to conduct integrated, end-to-end user acceptance testing.

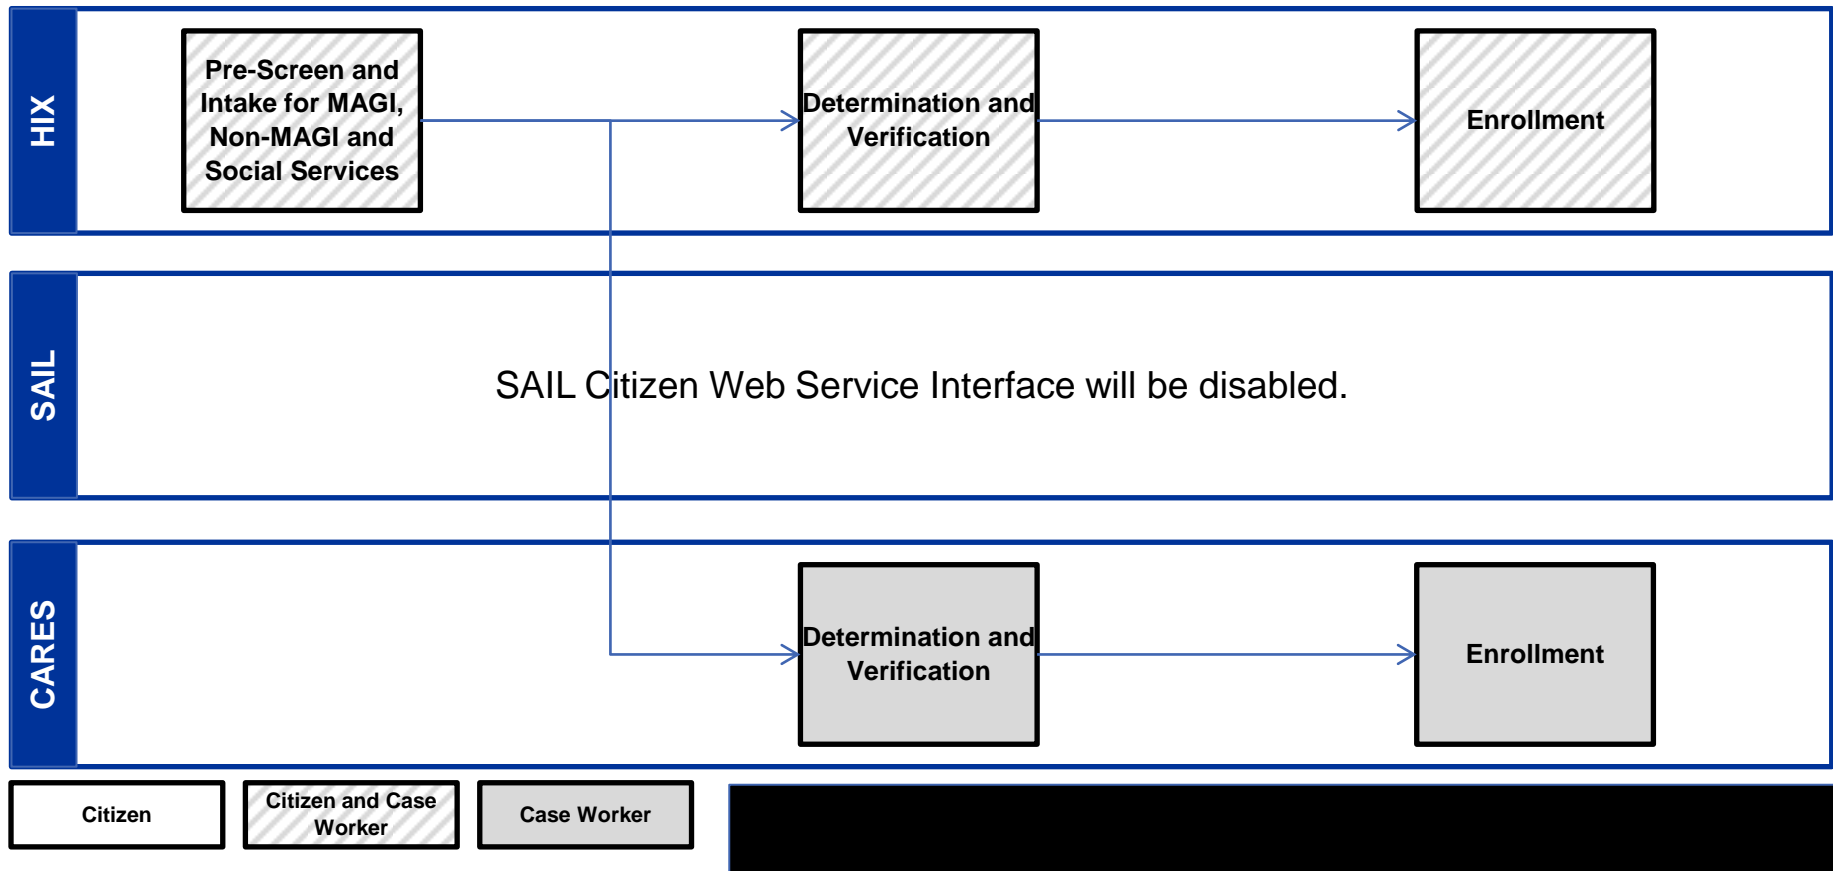

# External Stakeholder Engagement

---

- The Exchange will make available the HIX solution to facilitate focus group / external stakeholder discussions.
  - The Exchange will make public the dates / times of these demonstrations / testing opportunities
  - Demonstrations / testing opportunities will be hosted throughout the State to ensure the maximum amount of participants and diverse groups will have access to participate
- Feedback from these sessions will be processed through review boards and incorporated, where applicable, into the defined change management process established by the Exchange, DHMH, and DHR.
- External stakeholder groups include but are not limited to:
  - Advocacy Groups
  - Local Health Department / Department of Social Services Employees
  - Issuers
  - Community Based Organizations
  - Faith Based Groups
  - General Public

# HIX as the single entry portal

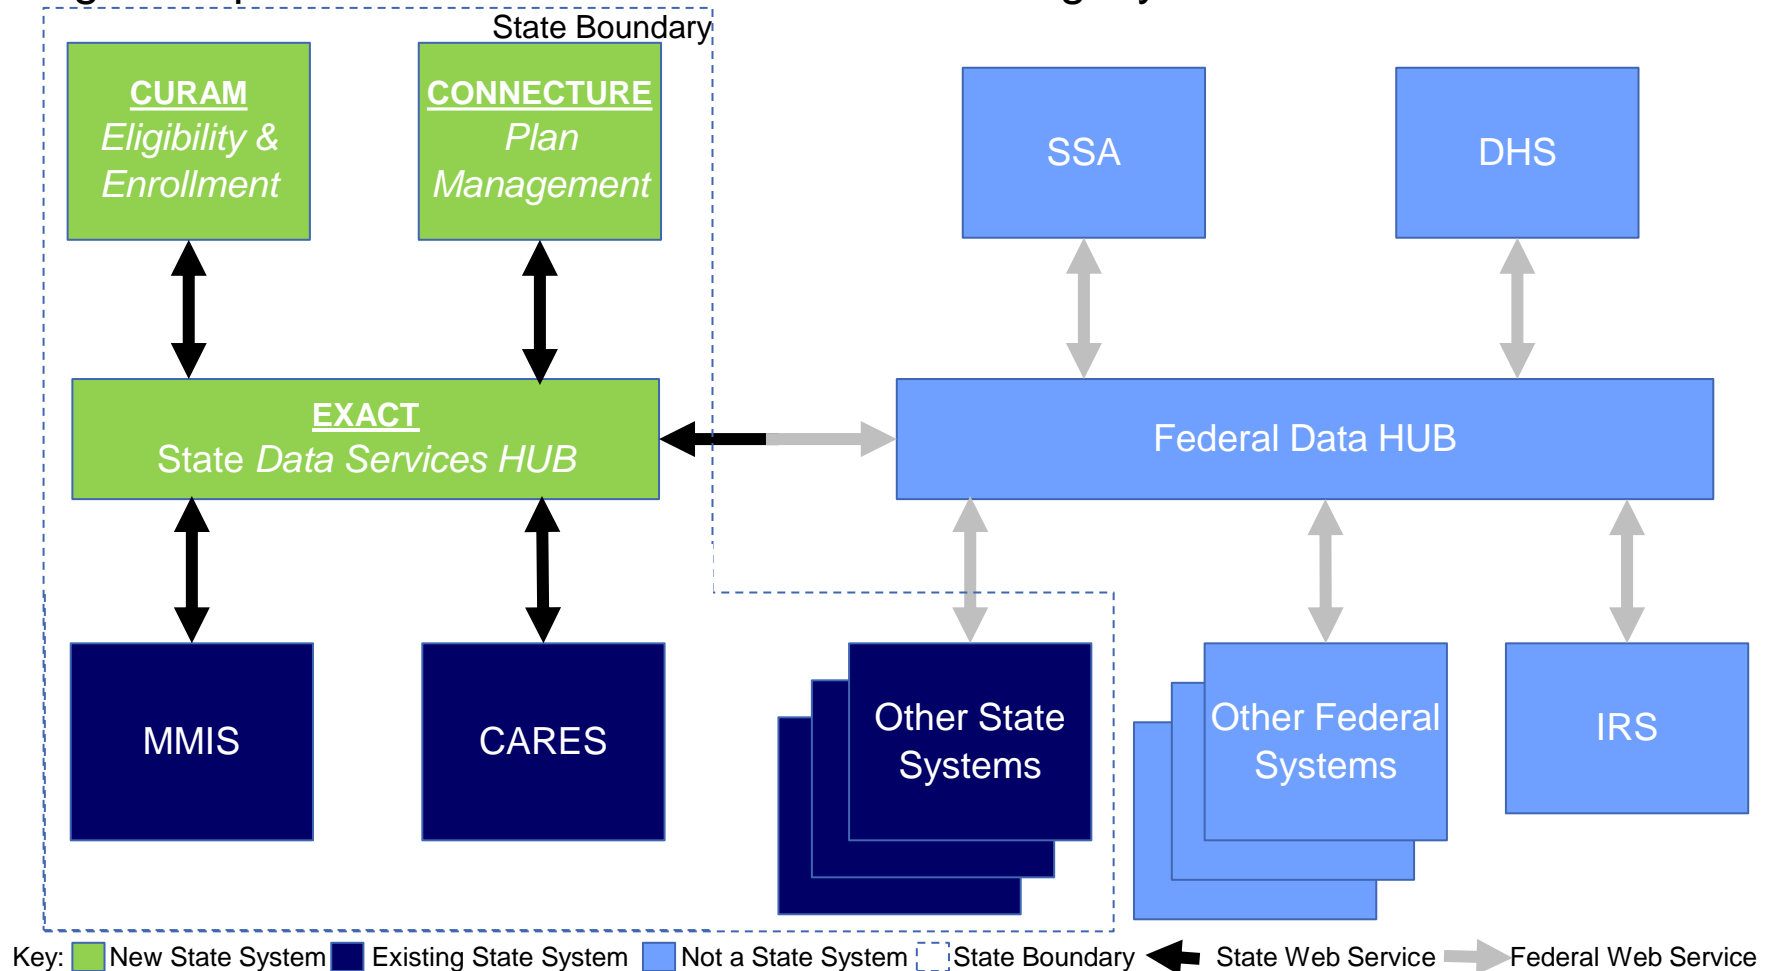

This solution uses a single entry point both for Case Workers and Citizens. Citizens and Case Workers will always start their cases in the HIX. Citizens would continue in HIX whereas Case Work will work in the HIX for MAGI and CARES for Non-MAGI and Social Services

# Solution Overview

Following is a potential illustration of how the MD HIX State Data Services HUB will connect to all other State systems, MMIS and CARES. Additionally, it will also be the single connection point to Federal Data HUB, which in turn also serves as single integration point to all other federal sources and legacy state sources.

### Available Functionality

Plan Management	<ul style="list-style-type: none"> <li>• QHP, MCO, Dental, Vision Plan Presentment</li> <li>• Plan Certification / Recertification / Decertification</li> <li>• Out of Pocket Cost Calculator</li> </ul>	<ul style="list-style-type: none"> <li>• Special Enrollment</li> <li>• Provider Search</li> <li>• Bill Presentment</li> </ul>	<ul style="list-style-type: none"> <li>• Integrated end-to-end solution (Completed HIX)</li> </ul>
Eligibility & Enrollment	<ul style="list-style-type: none"> <li>• Enrollment Application</li> <li>• APTC Eligibility</li> <li>• Homepage Design</li> <li>• Help Menu</li> </ul>	<ul style="list-style-type: none"> <li>• Navigator Login &amp; Account Management</li> <li>• Open / Special Enrollment</li> <li>• Update Account / Manual Verification</li> <li>• Enrollment w/out Eligibility Determination</li> </ul>	<ul style="list-style-type: none"> <li>• Integrated end-to-end solution (Completed HIX)</li> </ul>
Case Management	<ul style="list-style-type: none"> <li>• Eligibility Verification</li> <li>• Federal System Integration</li> <li>• State System Integration</li> <li>• Enrollment Application</li> </ul>	<ul style="list-style-type: none"> <li>• Case redeterminations / reassessments</li> <li>• Case Allocation / Transfer between counties</li> <li>• Employer Sponsored Coverage</li> </ul>	<ul style="list-style-type: none"> <li>• Integrated end-to-end solution (Completed HIX)</li> </ul>

# Solution – Details

This solution serves as the hybrid approach to allow changes in CARES, MMIS and/or HIX, all of which will be done by the respective vendors.

Component 1	Front end portal is HIX. (HIX / Testing from CARES)
Component 2	Public Interface of SAIL disabled. (CARES)
Component 3	All data edits are through HIX. (User enters data, all edits in HIX)
Component 4	Use of common ID(s) compatible with CARES, communicated real-time, and shared between systems. (CARES for CIS interface. HIX for HIX-side)
Component 5	HIX to check if MMIS to see if individual is receiving benefits and will send MMIS and 8001. (HIX)
Component 6	If data is published and consumed via web services, then HIX and CARES will use web services. (HIX)
Component 7	Trickling and sprouting will stop for MAGI in CARES. If Trickling and Sprouting occurs, MMIS will ignore it. (CARES / HIX)
Component 8	Seven notices need to be updated (remove the Medicaid part). (CARES)
Component 9	CARES will modify federal reports within the timelines needed. (CARES / HIX)
Component 10	CARES will analyze and modify other interfaces as necessary. HIX will create interfaces as needed. (CARES / HIX)
Component 11	Intermediate Data Store will be needed. (CARES / HIX)
